EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Becker on February 1, 2007. The application has been amended as follows:

- a. In claim 1, line 5, please insert -- disposed in the switch cabinet and -- between the words "modules" and "connected".
2. The following is an examiner's statement of reasons for allowance: The prior art of record neither describes nor specifically discloses an alarm and control system for a switch cabinet that can be opened and closed by an operator and that includes an electronically functioning locking unit for closing and releasing the switch cabinet door lock, the alarm control system comprising: a plurality of modules disposed within the switch cabinet and connected via the data bus, each module having a microprocessor for signal processing and a closed loop function scope, each module being designed only for the control of an individual function, and the modules processing independently of one another the signals conducted thereto and outputting a decision signal as a processing result. These, along with other switch cabinet specific claim limitations, render the application allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
